DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 09/06/2007 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 09/06/2007 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

Claims 3, 27, 28, 30, and 33-36 are allowed.

The following is an examiner's statement of reasons for allowance:

The references cited in the IDS have been considered. JP 2000-211951 recites a method of making a hermetic display device, which includes forming a conductive adhesion coating (7) on the periphery of the device. However, Applicant's claim recites the conductive coating extends outside of hermetic container, i.e. it originates from the inside of the hermetic container,

Art Unit: 2879

to which the reference clearly is silent. Furthermore, the reference fails to disclose or motivate the coating (7) being in electrical contact with the electrode on the second substrate.

JP 11-067126 recites a display device having an L-shaped conductive member (110) which does connect an electrode on the opposite substrate, however no motivation exists to motivate one of ordinary skill in the art to combine these references.

Therefore, regarding independent claims 3, 30, and 35, the prosecution history, especially at the previous Remarks by Applicant (02/22/2007, page 8) clearly indicates the reasons for allowance. Specifically, the prior art fails to teach or suggest wherein said conductive bonding member extends outside of said external frame, from an area between said first substrate and said external frame to said electrode to be in contact with said electrode, in combination with the remaining limitations of the claims.

The remaining claims are allowable due to their dependency.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of reasons for Allowance."
